Election/Restrictions

1. The inventions are distinct, each from the other because of the following reasons:

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-9 and 16-23, drawn to providing access to resources in response to clients' requests, classified in class 709, subclass 203.
- II. Claims 10-15 and 25-29, drawn to application/manipulation of data structure for data compatibility, classified in class 707, subclass 100.
- 2. The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as organizing a message file and its associated data structure for data compatibility. See MPEP 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
